Introduction

HASRent Rental Marketplace Builder is the perfect solution to build online rental website where sellers can showcase, rent and sell their products. It guarantees a multivendor rental website that's secure, scalable and brings all the important features promised by top marketplaces of the world. It also includes Reports & Analytics to get valuable insights which will help the admin to track useful aspects like rents, sales, traffic, registrations, conversions, etc. and formulate better future business strategies.

Sellers will be able to list their products for rent or sale after specifying the rental price, sale price, security deposit, shipping etc. on the website. Buyers will be able to browse and view the products under various categories and they will be able to rent or purchase the same after making payments on the website. The website will offer Pickup and Delivery options, delivery will be managed by seller either manually or through Shipstation API.

The buyers (wishing to rent a product) will be charged a refundable security amount while renting the product on the website. Once the product is returned to the seller, the seller will initiate the Security Refund in the system (Complete/Partial/No Refund) based on returned product condition. Admin will be overall controller of website, the commission through product rentals and product ownership sales will be major revenue generation business model for website.

Key Features of HASRent system

Frontend Key Features of HASRent

1. Design features

- Cross-browsers compatibility
- Mobile responsive
- Hamburger menu on mobile site
- Frontend and backend theme available with pre defined set of colors.
- Easily readable & clean font
- Breadcrumb Navigation
- User Friendly Navigation

2. Search Engine Optimization

- SEO friendly URLs
- Customizable Title tags
- Internal linking structure
- Optimized Page loading speed
- Generate Sitemap on a single click

3. Google Map Integration to search products near you

4. Registration

- Social Media Login including Facebook and Google
- Separate Sign Up process for Sellers and Buyers

5. Newsletter Subscription

6. Allow listing unlimited* number of products and users on site

Note: Our scripts do not limit the number of users and products but beyond 100,000 Users and 100,00 Products – You will need a more powerful server/hosting service and may be some optimization into the scripts and Database also as the database size and concurrent users count increase. Ideally we recommend that you should have the hosting budget of 100 USD per month if the average daily visitors count is up to 1000 Visitors. This budget should increase at least in the same proportion when your userbase/average daily visitors count is increasing.

—| Buyer Key Features |—

1. Buyers can search products with category filter to easily view what they want.
2. Buyers can shop on the system under different categories.
3. Option to save product as a Favorite. It will be displayed in Favorite Products list.
